**MEDIA STATEMENT**

**PROJECT YUMI DONATES ULTRASOUND MACHINES TO NCD PHA**

**Port Moresby, NCD, 15<sup>th</sup> October 2024 .**

The National Capital District Provincial Health Authority (NCD PHA) is pleased to announce the generous donation of two ultrasound machines from Project Yumi Inc. These machines, which have undergone functional testing and cleaning, will be installed in the Obstetrics & Gynecology and Radiology departments to enhance diagnostics services.

We are incredibly grateful to Project Yumi for this invaluable donation. The ultrasound machines will be instrumental in providing a range of essential diagnostic services to the people of NCD, including prenatal examinations for expectant mothers, detection of internal organ abnormalities, and medical procedure guidance.

Access to reliable diagnostic equipment is crucial for effective healthcare delivery. This contribution from Project Yumi, through their partnership with Queensland X-Ray, directly strengthens our capacity to serve the community and provide accurate and timely diagnoses.

This donation is a testament to the commitment of Project Yumi to improving healthcare in Papua New Guinea through their Project Meri health initiative. We look forward to continuing our partnership with them and other organizations to deliver quality health services to the people of NCD.
